### **Chipmunk Empowerment**

- Self discovery, trust, curiosity, balance

### **Chipmunk Dreams**

Curiosity, trust - and the balance between trust and caution.

Playfulness.

Darting from side to side (as in being flexible in your opinions).

## Chipmunk Totem

If chipmunk is your totem pay attention to how your energy is being used....

- Are your thoughts constructive or destructive?
- Are your fears keeping you from playing and enjoying life?
- Are you in charge of your life or have you given you authority over to another?

Chipmunk is the messenger of many realms. If this is your totem you are on your way to self discovery.

## Chipmunks teach

the art of observation and appropriate movement. Chipmunks have an air of independence and certainty about them. Their inquisitive nature leads them into unexplored territory and their detailed mind leaves no stone unturned.

## The Chipmunk

Chipmunk, like squirrels, embodies the quality of trust. They have little fear of people and are often found in rural areas, city parks and in the wild. Chipmunks are very curious and take the time to explore everything that comes across their path. They are inquisitive, fearless and playful. They do what they want to do in their own time frame. They are quite vocal often drawing attention to themselves.

## Chipmunk medicine people

will not tolerate being told what to do or when to do it. They make good leaders and spokespersons. By watching the chipmunks behavior much can be learned. They appear to scamper to and fro always in a hurry to get somewhere.

There is no detail that goes unnoticed by the chipmunk as they circle around and see beyond the obvious.

## Chipmunks way of life

Chipmunks generally gather food on the ground in areas with underbrush, rocks, and logs, where they can hide from predators like hawks, foxes, coyotes, weasels, and snakes. They feed on insects, nuts, berries, seeds, fruit, and grain which they stuff into their generous cheek pouches and carry to their burrow or nest to store. Chipmunks hibernate, but instead of storing fat, they periodically dip into their cache of nuts and seeds throughout the winter.

Their shrill, repeated, birdlike chirp is usually made upon sensing a threat but is also thought to be used as a mating call by females. Chipmunks are solitary creatures and normally ignore one another except during the spring, when mating takes place. After a 30-day gestation, a litter of two to eight is born. The young stay with their parents for two months before they begin to gather their own provisions for the winter ahead.

## Chipmunk Symbolism

Chipmunk people are often spunky, energetic, and trusting. They are often interested and self-governing, having their own agendas and are not likely to tolerate being told what to do.

Chipmunk medicine is deeply rooted in detail and observation.

## Attunement

There are no pre-requisites for this attunement. This is based on intent and may be sent as intent or chi ball.

Always ask your higher source to be with you and always thank them for being there with you.

Whatever procedure that you do for yourself to align with receiving attunements, please do them.

**This empowerment and manual is free of charge and may be used by anyone.**
