### **Crab totem** - Prosperity, success, high status

Crabs cast off their shells for new ones, and this is where the rebirth/cycling association plays its part. When the crab crawls into our consciousness we're reminded of the cyclical nature in our lives and what protection we may need for the path on which we embark.

The Crab signifies prosperity, success and high status . Never taking a direct forward, or head-on route, the crab makes its way on land with a sideways tap-dance.

## Crab dreams

In dreams, the crab is a representative of the sea and the sky. It represents physical nourishment which can be obtained from the sea and also intellectual nourishment. As with all water dwelling animals, the crab could also represent something in the unconscious and the emotions. BUT, at first glance a crab seems to be a very negative dream symbol. It could represent a "crabby" or unpleasant personality.

The claws could be symbolic of a clinging and hurtful person, or a side of your own personality. There may be too much dependence, clinging and forcefulness in your life. The crab may also symbolize your inability to effectively move forward and address your own difficulties. Some folklore interpretations say that the crab is an omen of poor health.

## Crab symbolism

The crab is a symbol of great strength and power in gripping and holding. It occurs on the coats of arms of several families. He symbolizes the male aspects of community, protection and home space. He is also a symbol of pending good luck. Those who share the qualities of the crab have the ability to escape confrontation by consciously sidestepping trigger issues.

Crab people have an uncanny ability to move through water (Emotions) to be unaffected by the moods and feelings of others, excellent for business or spiritual leadership roles. If the crab has come to you in a life or a dream, it is a message to let an issue that is troubling you go.

## Crabs

Crabs are generally covered with a thick exoskeleton, and armed with a single pair of claws. 6,793 species are known. Crabs are found in all of the world's oceans. Additionally, there are also many freshwater and global crabs, particularly in tropical regions. Crabs vary in size from the pea crab, only a few millimeters wide, to the Japanese spider crab, with a leg span of up to 4 m. About 850 species of crab are freshwater or partly global species; they are found throughout the world's tropical and semi-tropical regions.

## Behaviour

Crabs are mostly active animals with complex behavior patterns. They can communicate by drumming or waving their pincers. Crabs tend to be aggressive towards one another and males often fight to gain access to females. On rocky seashores, where nearly all caves and crevices are occupied, crabs may also fight for the best hiding holes.

## Diet

Crabs are omnivores, feeding primarily on algae, and taking any other food, including mollusks, worms, other crustaceans, fungi, bacteria and detritus, depending on their availability and the crab species. For many crabs, a mixed diet of plant and animal matter results in the fastest growth and greatest fitness.

## Cultural influences of the crab

The Moche people of ancient Peru worshipped nature, especially the sea. They placed emphasis on animals and often depicted crabs in their art. To the right you see a Moche vessel representing a crab.

The Cancer Constellation is one of the 12 Zodiac signs.
