

*SALAMANDER*  
*ELEMENTAL OF FIRE*

*Salamanders are the elemental embodiment of fire...Without the power and energies of the Salamander...Fire would not exist....*

*Can you imagine a world without fire...a body without fire? We would not exist\**

*Fire\*\*\**

*The giver of Life and Strength...it is the out flowing of energy from the Divine...the Source...which envelops all things...micro and macro...the smallest atom...to the largest Sun\*\*\**

*Fire is a purifying energy...yang...connected with strong and Divine will...It both creates and destroys...it brings forth new life and can dispense with the old and worn...Untamed and furious it can destroy All\*\*\**

*Yet...what would we be without fire...warmth...power...would we even be here...Our body's metabolic rate is running on Fire...we would not exist.....*

*What would our world be without the Galactic Sunship?*

*Fire...giver of light and cleanser of All...Diviner of Life and Will....initial seed of the ALL....*

*Divine and flickering light within...firing the seed of our consciousness within...*

*\*\*\*FIRE ELEMENTALS THE SALAMANDERS\*\*\**

*The Spirit Realm of the Element Fire is inhabited by the Salamanders...Spiritual Beings the strongest and most powerful of all Elementals...being mindful of this...respect is given in our dealings with these Elemental Beings...*

*Elementals are mystical creatures that dwell within the spirit realm of the elements. Elementals can be related to "nature spirits" that govern the forces of life. Both good and bad side of them?*

*Salamanders are beings associated with the element of Fire. It is through their activity that fire exists and can be used by humankind. Fire elementals were the first elementals to befriend humans, teaching them how to make campfires.*

*Salamanders move about most freely at night, appearing as balls of light drifting across various bodies of water. Old-time sailors often saw them investigating the sails of their ships - from this came the term "St. Elmo's fire", describing the mysterious forks of flame that often appeared on old sailing vessels.*

*Salamanders have a profound effect on human nature since they are linked to the activity of the bodies through which they maintain their temperature. They often appear to humans in the shape of small, lizard-like flames.*

*Salamanders are explosive, quick in movement, and very bright. They are also unstable, especially with respect to emotions. Fire is traditionally associated with Will, so one can expect Salamanders to be forceful and highly opinionated but also courageous and passionate in their unstable nature*
